Symptoms

Microwave hearing

Transmission of specific commands into the subconscious

Visual disturbances, visual hallucinations

Inject words, numbers into brain via electromagnetic radiation waves

Manipulation of emotions

Reading thoughts remotely

Causing pain to any nerve of the body.

Remote manipulation of human behavior from space

Harassment, stress symptoms such as helicopters flying overhead

Seeing, as in a camera, through your eyes, i.e. to see what you see exactly

Control of sleep patterns.

Computer-brain interface, control and communication

Complex control of the brain such as retrieving memories, implanting personalities

Symptom

1. Microwave hearing. The hearing of voices in the head from an outside source, but nobody else can hear the voices except the targeted individual.

Scientifically Proven

1. Yes. Ultrascience III, Spies are us. Featured Dr. James C. Lin, Ph.D.. biomedical and electrical engineer, educator, author of Microwave Auditory Effects and Applications, 1978. Lin demonstrated microwave hearing, a symptom of many of the victims, hearing voices. Also featured Cheryl Welsh on the issue of mind control experimentation. International Defense Review, 3-1-93, Special Operations Survives Pentagon budget Constraints, Ramon Lopez. "JASORS, Joint Advanced Special Operations Radio System is being developed by Harris Corporation. ...is a very ambitious, leading-edge technology program, ...Whiles JASORS is a near-term SOF, (Special Operations Forces)

enhancement, SORDAC,(Special Operations Research Development and Acquisition Center), is also investigating long-range (1998-2010) and "far-future" (2011 and beyond) weaponry and support equipment. [SORDAC's director, Army Colonel Douglas J.] Richardson said one far-future communications system being investigated is "synthetic telepathy." One day, SOF commandos may be capable of communicating through thought processes."

Margo Cherney FOIA request for complete NASA abstract Report Number: AD-A090426.,June 1, 1980. Brooks Air Force Base, Jan.25, 2000. The requested information is fully denied under 5 U.S.C. 552(b)(1)..." NASA abstract in part stated, "A decoy and deception concept presently being considered is to remotely create the perception of noise in the heads of personnel by exposing them to low power, pulsed microwave. When people are illuminated with properly modulated low power microwaves the sensation is reported as a buzzing, clicking, or hissing which seems to originate (regardless of the person's position in the field) within or just behind the head. The phenomena occurs at average power densities as low as microwatts per square centimeter with carrier frequencies from 0.4 to 3.0 GHz. By proper choice of pulse characteristics, intelligible speech may be created. Before this technique may be extended and used for military applications, an understanding of the basic principles must be developed. Such an understanding is not only required to optimize the use of the concept for camouflage, decoy and deception operations but is required to properly assess safety factors of such microwave exposure."

Microwave News, editor, Louis Slesin, Jan/Feb 1997 p 14. U.S. Air Force Looks to the Battlefields of the Future: Electromagnetic Fields That Might "Boggle the Mind "It would also appear possible to create high fidelity speech in the human body, raising the possibility of covert suggestion and psychological direction. When a high power microwave pulse in the GHz range strikes the human body, a very small temperature perturbation occurs. This is associated with a sudden expansion of the slightly heated tissue. This expansion is fast enough to produce an acoustic wave. If a pulse stream is used, it should be possible to create an internal acoustic field in the 5-15 kHz range, which is audible. Thus it may be possible to "talk" to selected adversaries in a fashion that would be most disturbing to them."

Federal Times, Dec. 13, 1976 Microwave Weapons Study by Soviets Cited. The Defense Intelligence Agency has released a report on heavy Communist research on microwaves, including their use as weapons. Microwaves are used in radar, television and microwave ovens. They can cause disorientation and possibly heart attacks in humans. Another biological effect with possible anti-personnel uses is "microwave hearing." "Sounds and possibly even words which appear to be originating intracranially (within the head) can be induced by signal modulation at very low average power densities," the report said. According to the study, Communist work in this area "has great potential for development into a system for disorienting or disrupting the behavior patterns of military or diplomatic personnel." No mention was made of the still-unexplained microwave bombardment of the American Embassy in Moscow. The study dealt largely with long-term exposure of days or weeks in industrial situations, which usually produce mild effects. Short exposure to intense radiation can cause heart seizure and a wide range of physical disorders.

Military interest or funding

1. Yes. See above.

Symptom

2. Transmission of specific commands into the subconscious

Scientifically proven

i need you to keep this as well and send it to momma

howrealareyou_m g: you will need to subpoena the phone numbers that the FBI has gather illegally and i p addresses that senator arlenton spector is trying to get to cross reference it with victims notes that has time and dates of suspect using devise of them trying to notify each person who was used ad them cover up complaints and not to respond to them

howrealareyou_m g: and it is a know fact that victim in formed 3 army personnel to give complaints to there commander to have them charge all involved and that victim needed medical to show them how this has put are military personnel in danger which also shows that these suspect will do anything to keep this covered up and would even sell out a navy Intel service man which also show that if there covering up this matter they will cover up the fact that navy intelligence may be for sell to the people we so call fighting and evidence shows that just from the non action that suspect are taking and hiding from the people and victims lawyers

howrealareyou_m g: which give this congress the grounds to have a navy team and other report only to this senator on its find and request that a Polly graph be taken by all suspect and it is a fact that victim has given the FBI and the us d,a.s office more time to give victims medical to prove either way these fact and that all they needed to do is have a team test victims ears with a devise that can trace signal to its source and they could have found the main 3 location and caught them in the act so now congress can use a team of seal are air force to locate suspect that has in danger there personnel and that has with information from them so that they would not find suspect it is a fact that this was planned due to the fact of more then 9 victims has complained of this matter

howrealareyou_m g: it is a fact if this complaint had come from someone with power are with money and non black this matter would be over and all would be facing the death penalty for there crime they have also planned if they got caught they would make sure that a judge and d a do not prosecute to the fullest
